Step 1 - Motherboard

- Use the flat end of a spudger to release the clips securing the power button shield along the top and the left edge of the power button board.
- Lift and remove the power button shield from the console.

Step 2

- Remove three 5.6 mm T8 Torx screws securing the power button board to the metal chassis.
Step 3
- Grasp the power button board and lift it straight up to disconnect it from its socket on the motherboard.
- Remove the power button board from the console.

Step 4
- Remove the following screws securing the motherboard to the metal casing:
  - Nine gold 11 mm T10 Torx screws.
  - Eight black 5.6 mm T8 Torx screws.
**Step 5**

- Lift the motherboard assembly from its front edge.
- Be careful not to damage the sockets as you rotate the motherboard away from the metal casing.
- Remove the motherboard assembly from the metal casing.

To reassemble your device, follow these instructions in reverse order.
